Inspurate Business Services

Project Manager

Description

Inspurate was founded in 2008 as a software development and IT outsourcing company. We specialise in web development, e-commerce, mobile applications, graphic design, UI/UX Design, SEO and Social Media services.

We are looking for a Software Project Manager who is good with team and client management and has a technical background in software development with an eye for the creative.

If you are good with team management and have a passion for software and user interface design this is the best place to get exposed to cutting edge new technology.

The position reports directly to the C.E.O. and Founder of the company.

Responsibilities

- Fluent in English and Urdu
- Prior experience managing software and design teams
- Must be able to multitask and good at time management.

Experience

Must be extremely detail oriented with strong attention to follow-through **Strong written and spoken English skills** that demonstrate outside the box thinking

- Communicate effectively in English in both written + verbal form
- Flexible in work functions + duties
- Should be highly presentable
- Ability to manage multiple tasks + meet deadlines
- Good time management skills
- Strong teamwork skills
- PC proficiency + strong skills in MS Office Suite (Outlook, Word, PPT, Excel) essential
- Experience in basic web development and authoring. (Must be comfortable working with HTML, CSS, PHP and WordPress which many our platforms are built upon.)
