

## Founding Developer – AI-Powered Startup

### Description

Our client is a bootstrapped fintech startup exploring AI-powered solutions for the banking industry. We're seeking a talented and flexible Founding Developer to join our team and help shape our product and technology.

We're looking for a versatile developer with a passion for AI, NLP, and innovation to join our founding team. You'll work closely with our founder to:

- Explore industry problems and opportunities
- Define and develop our initial product
- Research and implement AI-powered solutions
- Collaborate on business development and growth

### Responsibilities

- Contribute to product definition and market research
- Develop and test AI-powered prototypes
- Research and implement NLP and deep learning solutions
- Collaborate on business development, marketing, and growth
- Participate in industry events and networking

### Qualifications

- 2+ years of experience in software development with a focus on AI, NLP, or deep learning
- Strong proficiency in Python and relevant libraries (e.g., NLTK, spaCy, TensorFlow)
- Experience with cloud platforms (AWS, Google Cloud, Azure) and Agile development
- Ability to work independently, collaboratively, and adapt to changing priorities
- Strong problem-solving skills and willingness to learn

### Nice to Have:

- Familiarity with the banking industry or fintech in Pakistan and the region.
- Experience with DevOps practices (CI/CD, containerization) and data visualization
- Knowledge of security measures for sensitive data

### Job Benefits

- Competitive salary (Depends on experience)
- Opportunity to join a founding team and shape the company's direction
- Flexible working hours, remote work options, and a dynamic startup environment
- Professional growth and development opportunities
- Equity options (1-2% depending on experience and contribution)

### Hiring organization

Inspurate Business Services
